MINERAL COLOR, fabricant spécialisé dans le revêtement mural d'intérieur, vous propose son nouveau nuancier "Best Of 2" : une palette de 58 teintes pastel et vives vous permettant une application dans les locaux privés et publics (lieux de grande circulation, écoles...). Ce système, facile d'application en phase aqueuse et sans odeur, est un revêtement d'entretien aisée et très résistant.

Ceulà ci comprend 3 composantes :

- une **base acrylique** en phase aqueuse, à séchage retardé (200g/m²)
- des **paillettes traditionnelles** à projeter à saturation sur la base humide (180g/m² et 200g/m² pour les fines)
- un **vernis acrylique** mat, satin ou brillant de finition et de protection (100g/m²)

Classement au feu :

M1 appliquée sur plaque de plâtre cartonné.

N° 6060012-DMATII

MINERAL COLOR, der Spezialist für Innenwandverkleidungen, präsentiert Ihnen die neue Farbpalette "Best Of 2" : 58 Pastelltöne und kräftige Farben zum Gebrauch in Privathäusern und öffentlichen Gebäuden (Orte mit großem Publikumsverkehr, Schulen, usw.). Dieses geruchsfreie, in Wasser gelöste System lässt sich problemlos auftragen und bildet einen sehr pflegeleichten und widerstandsfähigen Wandbelag.

Das System umfasst drei Bestandteile :

- eine in Wasser gelöste **Acrylbasis** mit verzögterer Trocknung (200g/m²)
- herkömmlicher **Flitter**, der auf die feuchte Basis bis zur Sättigung aufgespritzt wird (180g/m² und 200g/m² bei Feinflitter)
- **Acryllack** (mat, seidenlackend oder glänzend) zur Endbearbeitung und als Schutz (100g/m²)

Brandschuttklasse : M1 auf Gipskartonplatten.

N° 6060012-DMATII

MINERAL COLOR, the specialist in interior wall coverings, announces its new "Best Of 2" colour range of 58 shades, both pastel and bright, for use in private and public buildings including heavy-duty applications, such as schools etc.

The **MINERAL COLOR** wall covering system is easily applied in a smell-free water-based form and is readily cleaned and very hard-wearing. It consists of three parts :

- a slow-drying water-based acrylic **base-coat** (application rate 200g/m²)
- standard flakes applied when the base-coat is still wet (180g/m² or 200g/m² for the finest grade)
- a matt, satin or glossy acrylic varnish that finishes and protects the covering (100g/m²)

Fire resistance characteristic : M1 when applied to paper-coated plasterboard.
